## Atlantic AirVenture TY Aviation Field Trip

**At Atlantic AirVenture Students receive an exciting introduction to the world of Aviation in a unique environment at our Aviation Education Centre facilities in Shannon, Co Clare**

Flight holds a particular fascination and thus is an excellent springboard for SMT Science , Maths and Technology subjects, making them relevant and linking them into real life.

The Transition Year Aviation Field Trip is an excellent opportunity to hear talks and tutorials from professionals working in the technical fields including Aeronautical Engineering and Design from University of Limerick, Aircraft Maintenance and Engineering from Air Atlanta Aero Engineering, FAS and Shannon Aerospace Limited who run apprentice training programmes right here in Shannon. Students who may be interested in a ground career may hear from Air Traffic Control training centre in Shannon and those who wish to take to the sky as a Commercial Airline Pilot from instructors at Atlantic Flight Centre in Cork or Airline pilots from major European and International Airlines \*

We believe that to gain an understanding of any career, it is vital to hear first hand information and experience from those in the field giving the student a better and wider understanding of the industry and the many diverse aspects and areas of speciality to choose from within the aviation business on a global basis.

\*speakers vary and are subject to availability,

## Flight Simulator Lesson

**“When once you have tasted flight, you shall forever more walk with your eyes turned skyward, for there you have been and there you long to return” Leonardo da Vinci**

Flight Simulation Training is a speciality at our centre, and students all get the opportunity to test their skill and teamwork with a special flight lesson module. Our team of qualified pilots have designed a lesson which is educational, exciting and fun. Everyone enjoys this including the teachers and we find that even the least enthusiastic student gets caught up in the spirit of it.

The instruction is all carried out by licensed pilots. It seems to engender huge self-confidence when they realise they are capable of flying a plane and opens up a whole new career prospect to them that they may not have considered before.

## Aviation Visitor Centre

To complete the day we include a visit to our Aviation Visitor Centre which includes a BAC 1-11 aircraft section with original instrumentation, a British Aerospace 146 Cockpit and a full size working Boeing 737-800 NG Flight Training Simulator. Field Trips can be tailored for any senior classes, if you have specific interests or enquiries please don't hesitate to contact us.
